

Ocean County is the second largest county in the state. We have 638 square miles of pine barrens. We have barrier islands and a coastline which runs along the Atlantic Ocean for 45 miles. Our County is unique as are our gardening situations. Some gardens are swept by the gentle Ocean breezes and others touched by pine scented air. Each garden requires different horticultural practices.

We offer information sheets on topics pertinent to Ocean County. Please visit this page from time to time to check out new offerings.
