Guidelines for Rutgers Master Gardener School and Community Projects

Master Gardeners WILL DO List

- Will provide services to only non-profit or not-for-profit organizations
- Will serve in an advisory capacity to educate the project participants in
  - Good garden design
  - Proper plant selection (especially non-invasive, native plants)
  - Sound horticultural and environmental practices
    - Soil preparation, including pH testing and soil analysis
    - Planting
    - Watering
    - Fertilizing
    - Mulching
  - Maintenance of newly planted stock
    - Weeding
    - Deadheading
    - Pruning
- Will set up a volunteer team of Master Gardeners to mentor the project
- Will welcome coverage by local press that promotes the Master Gardener program and the efforts of our volunteers to help others in the community
- Will provide the Administrator(s) of the facility with these guidelines

Master Gardeners WILL NOT DO List

- Will not provide manual labor
- Will not provide plant or other garden material
- Will not provide tools or other gardening equipment
- Will not be responsible for supervising project participants in the absence of the professional staff
- Will not continue a project at a facility whose Administration does not prepare for us by having project participants and supervisory professional staff ready to participate in scheduled gardening activities

I understand the above guidelines.
