

# ReNew Jersey:

## Renewable Energies in the Garden State

All images courtesy of Wikimedia Commons (<https://commons.wikimedia.org>)

Join us this fall for our continuing webinar series. Renewable energy is derived from natural sources that are replaced faster than they are used (for example, sunlight, wind, water flows, and geothermal heat). Because most renewable energies produce less CO<sub>2</sub> than nonrenewable energy sources, they are widely viewed as playing a role in mitigating climate change. This webinar series will outline types of renewable energies being pursued throughout New Jersey.

**September 18**

Mr. Dave Specca, Rutgers University  
*Historical energy use & future sources*

---

**September 25**

Dr. Dunbar Birnie, Rutgers University  
*Solar energy*

---

**October 23**

Dr. Douglas Zemeckis & Dr. Josh Kohut,  
Rutgers University  
*Offshore wind energy*

---

**October 30**

Dr. Serpil Guran, Rutgers University  
*Bioenergy*

---

**Webinars start at 6:30pm**
