

How to Build an Olla Watering System for Your Garden

RUTGERS UNIVERSITY
Cooperative Extension
of Ocean County
New Jersey Agricultural Experiment Station

Tuesday, April 15, 2025

7:00pm - 8:00pm

Ollas are traditional clay pots designed to deliver water directly to plant roots, slowly releasing moisture into the soil. Used for centuries worldwide, they offer an efficient and eco-friendly way to irrigate your garden while conserving water. Join us for a hands-on workshop where you'll learn about this ancient watering method and create your own olla for a small garden space.

Speaker: Shari Kondrup, Watershed Education and Outreach
Brick MUA
