How to Build an Olla Watering System for Your Garden

Wednesday, July 2, 2025
10:00am - 11:00am

Ollas are traditional clay pots designed to deliver water directly to plant roots, slowly releasing moisture into the soil. Used for centuries worldwide, they offer an efficient and eco-friendly way to irrigate your garden while conserving water. Join us for a hands-on workshop where you'll learn about this ancient watering method and create your own olla for a small garden space.

Speaker: Debra Cowles, Rutgers Master Gardener

FREE PROGRAM

Space is limited, be sure to register early!
